How to read this schedule. 'None found' means the publisher was queried and returned nothing in the search radius. 'Not assessed' means the query failed — it is not a clear result. Layers supplied by local planning authorities (conservation areas, tree preservation orders, Green Belt, local green space) are not yet published by every council, so a nil return there must be confirmed with the council.

This sheet does not include protected or notable species records, local wildlife sites or other non-statutory designations held by local environmental records centres, which a Preliminary Ecological Appraisal normally requires. Distances are measured from the red line to the nearest edge of each feature in British National Grid. Data was read from each publisher at the moment the sheet was made (25 Oct 2026 19:57) and may have changed since.
